## Senior Tips

### SESSIONS

On the day of your session, please arrive 15 minutes early. You will start by showing your photographer the outfits that you have selected to wear.

If you have any specific concerns about your clothing, poses, or body type, tell your photographer. We like to design creative and different senior portraits. Our photographers treat each senior differently and design sets especially for you and your wardrobe. We welcome your ideas and suggestions and want the best for your senior portraits, so let us create images especially for you.

### CLOTHING TIPS

Variety is the key to your session. The photographer will have a harder time creating a session with variety if all of your outfits are the same color. A general rule for clothing is solids. Simple is usually better. Trendy or outrageous outfits are great for one or two outfits during your session. The number one suggestion for clothing is... make sure it fits. If you feel comfortable you will look comfortable. This is important in posing during your session. Skirts and shirts that are too tight will wrinkle in all the wrong places.

### HAIR

Please arrive at the studio with hair and makeup complete except for minor touch ups. If you want to change your hairstyle during the session, tell the photographer prior to starting your session. REMEMBER... the longer you take in the dressing room, the less time in the camera room.

### PETS

If you're bringing an animal to be included in your session, please notify us when you book your session. We request that you bring someone with you to take care of the animal outdoors until we are ready for it in your portrait. We cannot allow animals to remain indoors for the entire length of your session. Small animals that are in pet carriers are welcome to stay indoors throughout the entire session.
